

SYMPOSIUM

on the Politics of Translation in the Age of Technoscience

Interdisciplining Knowledge Cultures?

Interdisziplinierung?
Wissenstransfer und Übersetzungspolitik
in einer neuen Technowissenschaftskultur

8.-10.1.2009

Braunschweiger Zentrum für Gender Studies

TU Braunschweig, Neuer Senatssaal
Pockelsstraße 4

Today, we experience an intensified knowledge transfer between technosciences, humanities, social sciences and art. The symposium discusses the politics and media of this knowledge transfer, its practices and underlying frames of thought. We ask whether these new developments support a more open, creative knowledge culture or one of formal compatibility and de-contextualization.
